MULTIPURPOSE SHIFTING SHREDDER

The TL series shredders are multi-function machines with side hydraulic shift. Since they can work both in central and in side position, with their changeable working angle within a large space, they're perfect for cleaning and maintaining slopes, edges of the roads, ditches, trenches and, in general, slanting grounds. Thanks to their side shifting, they can be used also for working in olive groves or small-crowns fruit farms.
