

INTER-ROW MOWER

INTER-ROW MOWER WITH HYDRAULIC POINTER EQUIPPED WITH SELF-LEVELLED ROLLER

FOR THE SERIES
TR8 - TR8V - TR9 - TR9V - TR10 - TR10V

The mini inter-row shredder allows a good cleaning of grass in a inter-row way, working between plants. It allows to achieve finely cut and exhausted remains even by starting from hard or resinous woods.

STANDARD EQUIPMENT

1. Connection kit of your choice for models
   - TR8 / TR8V
   - TR9 / TR9V
   - TR10 / TR10V
2. hydraulic Interow complete system

OPTIONAL REQUESTS

- Independent hydraulic system consisting of a pair of distributors, double pump, tank and heat exchanger with fan cooling (strongly recommended)
- Returned hydraulic small piston for inter-row mower
- Upright setting hydraulic piston
- Hydraulic piston for inter-row flail inclination adjustment (to be fed by tractor, recommended for ditches and irregular terrain)
- Electrical control unit for controlling the electromagnetic valves of the pistons (with this accessory no power-take off is required, but only 12v power socket)

N.B.

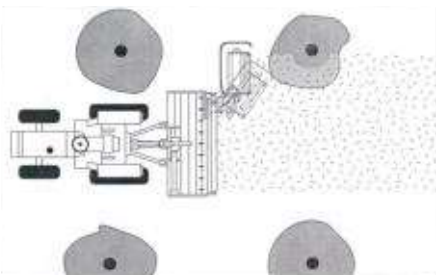

For having the mower working with its accessories, hydraulic one-effect and two couples of double-effect quick realeases couplings are required; if a shredder with hydraulic shift is used, you need three couples of double-effect in addition to the one effect quick release coupling.
